NAAC Accreditation A Grade

❖ **Library Software – Vidyasagar (OPAC System)**

The Mahavir Mahavidyalaya Library uses Vidyasagar Library Software, a comprehensive digital solution for efficient library management. This software facilitates the automation of core library functions including cataloguing, circulation, membership management, and reporting.

☐ **Online Public Access Catalogue (OPAC)**

The library catalogue is fully computerized and accessible via OPAC terminals available in the library. Users can also access the catalogue from any computer across the campus network using a standard web browser.

Through OPAC, members can:

- Search for books by Title, Author, Subject, or Keywords
- Check the availability status of a specific book
- Locate books by call number or shelf location
- View newly added books via the “New Arrivals” section

Note: Some books may not be physically available on shelves as they might be issued to other members. Always use the OPAC to get a complete and accurate overview of available and issued resources.

☐ **Help Desk Support**

Library staff at the Help Desk are available to assist with OPAC searches, book location, and general reference queries.

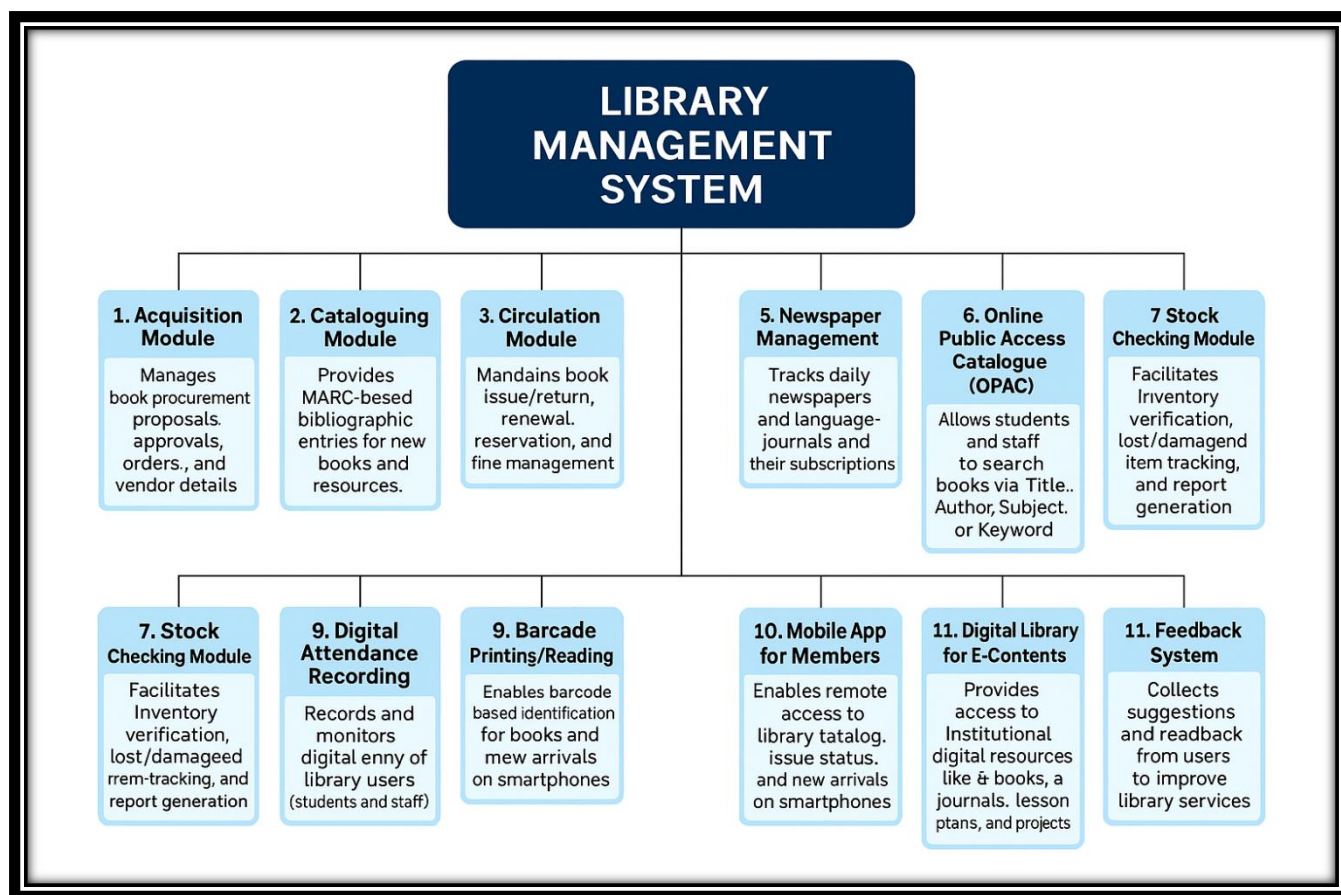

☐ **Book Suggestions**

The Library welcomes recommendations for new book acquisitions from students and faculty.

- Suggestion forms are available at the Help Desk.
- Recommendations should be routed through the Head of the Department.
- Priority is given to titles that support academic study, syllabus content, and research needs.

Vidyasagar Library Management System (LMS) – Modules

The Library is fully automated using the Vidyasagar LMS, a robust and user-friendly library software designed to manage all library operations efficiently. The system offers the following integrated modules:

Vidyasagar LMS Features

24x7 secured
access to Cloud

User-friendly
